Our teaching approach

Our approach to distance learning is student-focused and uses information and communication technologies to structure the learning experience.

The approach is based on:

- giving individualised attention
- creating a shared learning experience
- adapting to the subject being taught
- relating to the student's environment
- providing continuous evaluation
- using one-on-one tutoring

Prospective students

We provide learning to:

Individuals over 18 years of age who, for a variety of reasons, cannot attend school in person.

Individuals between 16 and 18 years of age who are in the one of the following situations:

- residing far from a school or living abroad
- having a disability
- being a member of a special group, such as sportspeople and musicians
- having a job
- finding themselves in other circumstances, which will need to be evaluated by the school administration

In exceptional cases, students under 16 years of age who have authorisation from the Ministry of Education may enrol.

Institut Obert de Catalunya

With us, you can pursue the following educational programmes:

- 1** A course to obtain the **GES secondary-school equivalency diploma**
- 2** A **higher secondary-school** degree (in one of four pathways): the arts, natural and health sciences, humanities and social sciences and technology
